I'm a Backend Software Engineer with experience building APIs, integrations, scalable systems, and modernizing legacy applications. I've worked on business-critical systems, including a platform used by more than 400 dental clinics and solutions impacting more than 2,000 users.

EXPERIENCE

Maintainer & contributor

Ongoing

Open source & community
I develop and maintain open source projects used by developers and companies, focused on backend, integrations, and extensions for established tools.

- Creation and maintenance of plugins for the GLPI ecosystem, including authentication (SSO) and customization.
- Projects with real community adoption, including repositories with hundreds of users and dozens of contributors.
- Libraries and integrations for frameworks such as Yii, including database support for Firebird and Informix.
- VS Code extensions aimed at developer productivity.
- Active collaboration with the open source community through issues, pull requests, and documentation.

Software Engineer

March 2025 - May 2026

Socialcompany · Paraná, Brazil
Built backend and fullstack solutions for internal products and clients, including AI-powered applications, APIs, and modern systems.

- Created backend APIs and services with NestJS, TypeORM, and PostgreSQL.
- Developed AI-powered solutions applied to real business problems.
- Implemented interfaces with React and shadcn/ui.
- Built an Android/iOS mobile app with Expo, React, and TypeScript.
- Delivered end-to-end solutions connecting backend, frontend, databases, and external integrations.

Senior Fullstack PHP Developer

August 2019 - February 2025

Oral Sin Franchise · Paraná, Brazil
Responsible for evolving and sustaining the franchisor's core system, used by more than 400 dental clinics, focused on backend, APIs, integrations, and legacy modernization.

- Technical leadership on migrating the legacy system to Laravel 7, improving maintainability and platform evolution.
- Developed business rules and critical APIs for clinic operations.
- Implemented data integrations with Power BI to support strategic decisions.
- Worked on infrastructure, stability, monitoring, and alerting with Zabbix.
- Maintained and evolved systems with a focus on reliability, performance, and operational continuity.

Full Stack Developer

May 2014 - August 2019

Móveis Romera Ltda. · Paraná, Brazil
Built systems, reports, and integrations to extend a legacy ERP, focused on backend, data, and automation.

- Created PHP/Yii systems integrated with a legacy ERP in xHarbour.
- Developed web reports and integrations between internal systems.
- Administered and customized GLPI, including plugin development.
- Automated processes with tools such as Zabbix, WordPress, and MediaWiki.
- Worked on data analysis and BI.

EDUCATION

Universidade Estadual de Maringá

2013 - 2014

Postgraduate specialization in Web Development

Universidade Unopar

2009 - 2011

Associate degree in Systems Analysis and Development
